Greetings from the Organizing team

Welcome to the Smart city VISAKHAPATNAM, the financial capital of Andhra Pradesh. With its location contributing to the picturesque landscape of the city, it offers a number of tourist attractions. Landmarks in the city include Dolphin nose, the beautiful RK beach housing the Kursura museum, Kailasagiri hill park, Thotlakonda- a sacred Buddhist site and eco-tourism destinations like Araku hill station, Borra caves in Ananthagiri hills and many more splendours..... that will keep your spirits soaring.

GITAM Dental College and Hospital situated in the lap of lush greenery in a beautiful campus is delighted to host a speciality convention EndoCon-2017 on 5th & 6th August, 2017.

"Explore, Conserve and Rehabilitate" is the theme of the convention and this would be a good platform for all of us to interact, update and share knowledge and ideas.

We look forward to your participation to make this a memorable and fruitful event.

Conference Highlights

- Keynote lectures by Eminent National and International Speakers
- Live Demo by Dr. B. Mohan
- Post Graduate Students - Papers & Poster presentations
- Gala Banquet Dinner

Guest Speakers

Dr. Vimal K Sikri

President, IACDE

Director, Punjab Institute of Medical Sciences, Jalandhar

Restore Sweetly

The basic objective of restorative dentistry is to develop the form, function and esthetics of the teeth to be in harmony with the stomatognathic system. When there is extensive loss of tooth structure, to provide resistance to the tooth and retention to the complex restoration, indirect restorations like cast/ceramic inlays, onlays and post and core are indicated. This presentation emphasizes the concept of precision restorations and its importance in stomatognathic system.

Dr. Mohan Bhuvaneshwaran

General Secretary, IACDE

Branded Educator for American Academy of Cosmetic Dentistry

Secrets of Predictable Composite Restorations

Smile makeovers have become common in our day to day practice these days. Today's Cosmetic Dentistry revolves around minimal preparation Dentistry and unnecessary reduction of tooth structure is not warranted. Composite resin restorations are very tooth friendly, since they require only minimal tooth preparations keeping the final outcome in mind and then formulating the treatment plan is the key to success. In that sense composite do have a major role in many of our smile make over cases. Some how, due to the increased chair side time involved and the difficulty in achieving an awesome smile pushes the composite to the back seat, when compared to ceramics, This presentation will take through the various practical secrets of creating happy and lasting smiles with composite restoration.

Dr. V Gopi Krishna MDS, FISDR

Vice Principal - Academics

MGR Educational Research Institute University, Chennai

Microscopic Endodontics

The evolution of contemporary clinical endodontics has reached a phase of precision and perfection due to the twin applications of microscopes and ultrasonics. This clinically oriented presentation would give an overview of concepts needed to integrate dental operating microscopes and ultrasonics into day to day endodontic practice.

Dr. Mamta Kaushik

Professor and Head

Army College of Dental Sciences, Secunderabad

“From the Sword to the shield - Redefining caries Management”

The topic will cover an overview of the caries disease and more to evidence based caries management. Very briefly stresses on the confounding factors towards the development of the disease and moving on to emphasizing on the early detection and diagnosis of caries lesions. The present talk emphasizes on the patient risk assessment and highlights the protocol for the management with minimally invasive techniques.
