2\textsuperscript{nd} International & 5\textsuperscript{th} National Endodontic & Conservative Dentistry Clinical Research & Case Report Convention

26\textsuperscript{th} & 27\textsuperscript{th} Aug 2016
It is our honour and a great pleasure to host our

2nd International & 5th National Conference

ECCLIRES 2016

to promote and share the ideas in the field of clinical research.

We express our heartiest welcome and cordially invite all the delegates and participants for yet another clinical research meet.

We assure you that this conference will serve as a platform to discuss the latest clinical research & case reports with advances in technology. It provides an opportunity for the participants to exchange knowledge, share their ideas which in turn strengthen and improve clinical research.

On behalf of the ECCLIRES team, we would like to invite one and all. Looking forward to welcome you to the historic and beautiful city on 26th, 27th August 2016.

Dr. J. Srinisha
Chief Patron

Dr. A. Subbiya
Professor & HOD Organising Secretary

Dr. V.G. Sukumaran
Professor Organising Chairman

Dr. Paul Abbott  B.D.Sc., M.D.S., FRACDS (Endo.)
Professor of Clinical Dentistry, University of Western Australia

Internationally acclaimed speaker Prof. Paul Abbott, a specialist endodontist is the Winthrop Professor of Clinical Dentistry. He has lectured extensively in 42 countries, has published 138 articles in refereed journals and 20 textbook chapters. He is currently Editor-in-Chief of the Journal, Dental Traumatology. He also serves on Editorial Boards and Scientific Review Panels of 17 International Journals. He has been felicitated with many prestigious awards in recognition of his services to clinical dentistry, teaching, research and professional societies.

Understanding Pulp, Root Canal and Peri-Radicular Conditions
It is essential that clinicians understand the conditions they are diagnosing and treating. A poor understanding leads to incorrect or poor management. Unfortunately, most classifications of pulp, root canal and periapical conditions in textbooks and journals are confusing and based on outdated concepts. This lecture will provide a simple outline of the disease processes involved along with a classification that is clinically meaningful, possible to use and useful for all clinicians.

Diagnosing Pulp, Root Canal and Peri-Radicular Conditions
The diagnostic process is perhaps the most important aspect of patient management. It is akin to a jigsaw puzzle as particular information must be gathered and put into place to arrive at a diagnosis. The information is obtained through various tests and procedures but many clinicians either do not do them or they do not understand what the results mean. This lecture will outline the diagnostic tests and how to interpret them.

Strategies to Reduce the Consequences of Trauma to the Teeth
Trauma to the teeth is common and can result in various consequences, ranging from minor to severe. Early and appropriate management is critical to reduce these consequences. This lecture will outline the various tissue responses to trauma and will provide guidelines for effective and predictable, management to reduce the potential consequences of trauma to the teeth.

Dr. V. Gopi Krishna  B.D.S., M.D.S.,
Professor, Department of Conservative Dentistry & Endodontics, Thai Moogambigai Dental College, Chennai.

He is an Academician and Clinician of International acclaim. He is the editor of four internationally acclaimed text books and the Editor in Chief of the Pubmed indexed Journal of Conservative Dentistry (www.jcd.org.in) which is the official journal of the Indian Association of Conservative Dentistry and Endodontics.
He is a Prolific Researcher who has won 9 best paper awards and has more than 50 pubmed indexed publications. He has been conferred with the fellowship award of Indian Society of Dental Research.

Critical Analysis of Current Clinical Protocols in Endodontics
The ultimate goals of endodontic therapy of infected root canals is to achieve intracanal disinfection and to functionally rehabilitate the tooth. “There are more than one ways to skin a Rabbit”, is a popular English idiom that all of us are aware of and typically in endodontics; we have various alternatives in the form of instruments, materials and techniques to achieve this common goal. This evidence based presentation would provide a researcher’s as well as a clinician’s overview of the effectiveness of various methods of shaping and cleaning of the root canal and provides an objective overview in enhancing our ability to strive for perfection in endodontics.
Registration Fees: Rs. 2,000/-

Venue: Hotel Accord Metropolitan, T.Nagar, Chennai.

Organising Committee

Chief Patron: Dr. J. Srinisha
Advisors: Dr. S. Raghavendra Jayesh, Dr. S. Bhuminathan, Dr. L. Lakshminarayanan, Dr. M.R. Srinivasan
Organising Chairman: Dr. V.G. Sukumaran
Organising Secretary: Dr. A. Subbiya
Convener: Dr. P. Vivekanandhan
Scientific Committee: Dr. V. Prakash, Dr. R. Mensudar, Dr. A. Karthick
Co-convener: Dr. A. Venkatesh
Registration: Dr. Malarvizhi D, Dr. Anuradha B
Treasurers: Dr. S. Mitthra, Dr. N. Geetha Priya
Reception Committee: Dr. R. Tamilselvi, Dr. N. Gold Pearl
